

Capabilities Statement

The Apelago Group is a leading Service Disabled Veteran Owned Small Business (SDVOSB) provider of professional services including staffing and consulting services. With clients ranging from governmental agencies and prime contractors to Fortune 500 commercial organizations and startups, we understand the increasing need for talented professionals in your organization. The Apelago Group aims to help our clients gain a competitive advantage or improve efficiencies through building high performing teams. Whether it's through staff augmentation, providing consulting services, Apelago excels at finding the right people for our clients.

The Apelago Group has a successful track record of delivering highly skilled professionals across multiple disciplines, agencies and industries. Within those industries, some of our strongest practice experience lies in and around the following.

- **Information Technology:** Project management, application development, packaged systems implementations and infrastructure support services.
- **Engineering and Manufacturing:** including design, engineering, manufacturing and quality engineering.
- **Life Sciences:** Including clinical research, scientific, mental health research and healthcare related services.
- **Environmental:** Remediation, site restoration, water quality, municipal or urban engineering, water & wastewater, ecology and compliance.

Information Technology

The demand for professionals in the Technology field is rapidly evolving and expanding new web based, cloud-based, mobile, social media and packaged applications emerge. Our governmental agencies are increasingly evaluating and adopting these new technologies and are looking for better ways to complete projects on time, within budget and with the expert staff needed to complete these projects. Finding the right professionals to fill these critical roles can be challenging. At Apelago Group we can meet this challenge by leveraging our teams more than 50 Years of technology staffing and consulting experience. Some of the skill sets that we can provide include:

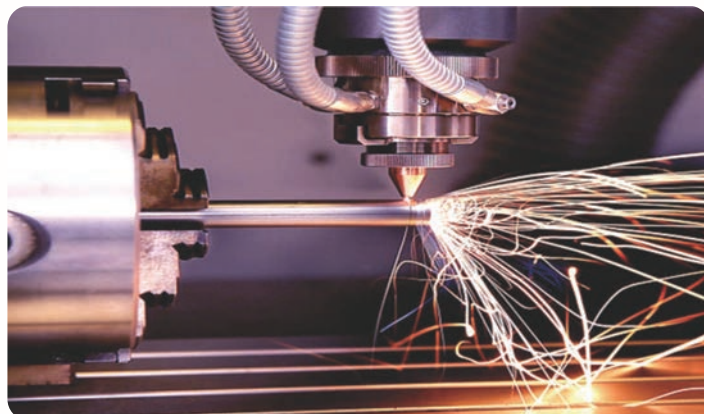

- Application Architects
